

CISY 217-95v Operating Systems
Fall 2018 CRN: 12672
Syllabus v0.0

Section Info

Section 95v - CRN 12672

Online Section

This Online Section of the course does not meet in a classroom. This section uses a Learning Management System (LMS) called Canvas. See: <http://pwmanager.raritanval.edu>

Versions

- Version 0.0 - 8/27/2018 - Initial Version

Book Information

Understanding Operating Systems, 8th Edition, Ann McHoes and Ida M. Flynn, Cengage, 2018,

eBook ISBN-10: 1337669423 ISBN-13: 9781337669429

Bound Book ISBN-10: 1305674251 ISBN-13: 9781305674257

Picture of Cover:

Instructor

Name: Stephen T. Brower

Office: West Building W324

Work # (908) 526-1200 x8259

preferred email: stephen.brower@raritanval.edu

[...for those who had Brower before the Spring 2015 semester, this is a NEW email...]

Instructor's Website

The Instructor's website has information on any changes to office hours (example: no office hours on Thanksgiving)

Website has a link to the class page for this course where you can get the Syllabus and Class Schedule in case Lion's Den and/or Canvas is down...which rarely happens...

See: <http://rvccmccs01.raritanval.edu/~sbrower/>

CISY 217-95v Operating Systems
Fall 2018 CRN: 12672
Syllabus v0.0

Fall 2018 Office Hours (8/29 - 12/10)

- Monday 3:00 - 5:00
- Tuesday 4:00 - 5:00
- Thursday 3:00 - 5:00 [excluding 11/22]
- AND by appointment

Course Overview

Prerequisite/s: CISY-103 Computer Concepts & Programming or CISY-105, Foundations of Computer Science, or permission of the Instructor) Operating Systems introduces the student to the fundamental concepts and facilities of the system software which manages all computers. Topics include: memory management, process management, processor management, process synchronization and coordination, device management, the user interface, security and administration. Students will learn operating systems concepts and theories and apply them to commercial operating systems. [Also CIS Elective]

Course Routine

The "traditional sections" of the course usually consist of 3 possible segments: Lecture, Lab Lecture, and Lab Time

As an online course, there is no lecture. But there are slides to look at, and the Instructor has created some (lame) YouTube videos.

As an online course, you will work on the labs independently. If you get stuck instead of raising your hand you will send an email to the instructor.

You should be able to do ~95% of the work from your computer at home. But there may be 1 or 2 lab exercises that will require a Windows based computer to complete the lab. An effort has been made to provide "Mac" alternatives to the Windows based labs.

The approach that the course takes is that weeks end on Wednesdays. So assignments are due on Wednesdays but can be submitted early.

CISY 217-95v Operating Systems

Syllabus v0.0

Which Email to use and Email Response Time

If you have a question or you need an assignment “returned to you” in Canvas, the preferred (fastest) way to contact the instructor is via his preferred email: stephen.brower@raritanval.edu

Over the Summer 2018, I used Canvas for another course and I found the email system embedded in Canvas frustrating. So please email me at: stephen.brower@raritanval.edu

The goal is to respond in less than 24 hours.

Occasionally there are known exceptions such as around Thanksgiving where a response may take a little longer. If the instructor knows ahead of time there will be a period of unavailability longer than 24 hours, that will be communicated to the class.

Grade Determinants

Item	Percent
Homework	15%
Labs	20%
Discussions	10%
Research Projects	15%
Mid-Term Exam	20%
Final Exam	20%

Grades

Grade % Range

A	89.5-100.0+
B+	86.5-89.4
B	79.5-86.4
C+	76.5-79.4
C	69.5 - 76.4
D	59.5 - 69.4
F	0 - 59.4

CISY 217-95v Operating Systems

Fall 2018 CRN: 12672

Syllabus v0.0

Homework

The Homework assignments will be posted in Canvas and are available from the Syllabus tab and the Modules tab in Canvas.

The homework will be submitted via Canvas. The documents you submit can be:

- typed in Microsoft Word and the .docx file attached
- typed in different word processor as long as it is saved in RTF format and the RTF file can then be attached
- For some items you may want to handwrite/draw the homework, scan it using a scanner (or digital camera), and then you can attach the picture

See below for the Late Policy(-10 pts a day) and the Cheating Policy (don't cheat)

Labs

Labs are available from the Syllabus tab and the Modules tab and will be a combination of problems assigned from the book or problems provided by the instructor. Some labs may have parts that require simple searches either on the Internet or the ACM Digital Library.

Files to be submitted for the labs will be submitted via Canvas

See below for the Late Policy(-10 pts a day) and the Cheating Policy (don't cheat)

Discussions

The Discussions can be thought of as a "class participation" grade, but one that can be quantified. The Discussions are available from the Syllabus tab and the Modules tab. There will be about 1 discussion a week

Many of the topics ask for your opinion and there is no right or wrong answer, but the answer has to address the question. For example, if the question was "would you enter your credit card # on a web page?" and your answer was "I feel society has become too materialistic" that doesn't answer the question and that would be a 0. But if your response was "I wouldn't enter my credit card # *because I don't have a credit card* because I believe society is too materialistic" that does answer the question of 'entering the credit card #' and that would be a perfect score.

If I was a good online teacher, I would make the grade based not only on your post, but on your meaningful responses to at least three other postings.

But, since I'm not a good online teacher ~~your grade will be based 80% on your post and 20% on your reading of the other students posts (I can run a report to see how many postings you read).~~ No I can't. I hate Canvas. Your grade will be based 100% on your post.

CISY 217-95v Operating Systems
Fall 2018 CRN: 12672
Syllabus v0.0

See below for the Late Policy(-10 pts a day) and the Cheating Policy (don't cheat)

Research Projects

Research Projects will be individual research exercises that are little more involved than Labs but not as formal as a Research Paper. Research Projects will usually have more than a week to complete.

Research Projects will be done in a word processor (Microsoft Word or a different Word Processor and saved in rtf format).

Research Projects will be available from the Syllabus tab and the Modules tab in Canvas

See below for the Late Policy(-10 pts a day) and the Cheating Policy (don't cheat)

Exams

Note the Class Schedule for the due dates for the exams.

Exams must be completed by the date due. The exams will be posted at least a week before they are due.

The Midterm Exam will be a combination of multiple choice and "problem" based questions; the Final Exam will be multiple choice only. The exams will be completed in Canvas.

Cheating Policy

Don't cheat!

You must work alone on the Research Projects, Labs, and Homework. Working with someone is considered cheating. Taking a file that someone else created is considered cheating. Having your neighbor work on your computer is considered cheating. Collaborating on logic is cheating. Cheating is not allowed.

Cheating is also not allowed on Exams.

All parties involved in cheating (including the one who shares) will be dealt with according to the school's policy on cheating. The penalty can range from 0 on the assignment to F for the course.

CISY 217-95v Operating Systems
Fall 2018 CRN: 12672
Syllabus v0.0

Late Policy

For those that had a class with Brower before the Spring 2015 semester take note: this is a different policy than in the past

When the instructor sits down to grade Homework/Labs/Research Projects, whatever is there is considered on time. Meaning, although assignments are due on Wednesday, if the instructor grades it on Friday whatever is there is on time.

Assignments received after when the instructor grades the assignments for the class will be considered late and will be penalized 10 points per calendar day starting from the "due day". Assignments 7 calendar days late will receive a 0 and the 0 will be used in the calculation of your average. Assignments will not be accepted after being 7 days late. Late Assignments will not be accepted after 12/5

It will vary week to week when an assignment is graded, but the safest thing is to assume that Thursday is the grading day.

"Life Happens"

"Life Happens" - for Homework, Labs, and Research Projects you are allowed 1 "Life Happens" for each category. A Life Happens allows an assignment to be submitted one week late and be considered on time. Life Happens cannot be used for an assignment beyond 1 week from the "grading date"

Life Happens cannot be used after 12/. That means the "life happens" can't be used for the last Homework / Lab / Research Project.

Extra Credit

Some exams/homework/labs/research projects contain extra credit questions/opportunities. Other than that, no extra credit opportunities will be provided.

For example, if you choose not to submit ANY homework and then in November you ask for "Extra Credit" to make up for the missed homework, the answer is NO.

Syllabus v0.0

Additional Policies

Class Attendance

Attendance for an online course will be based on discussions and submission of assignments.

For the record, the policy is: Students are expected to attend all classes for every course in which they are enrolled. To accommodate students' reasonable, personal situations that might prevent them from attending classes, each student is entitled to excused absences amounting to the equivalent of one week's class time in a semester. Absences in excess of this standard are handled individually by each faculty member. A student with absences amounting to one-fifth or more of the term's lecture or laboratory classes is subject to administrative withdrawal by the Dean of Instruction upon the recommendation of the faculty member.

Reasonable Accommodation

Students with disabilities who require accommodations (academic adjustments and/or auxiliary aids or services) for this course MUST provide documentation of accommodations from the RVCC office of Disability Services, C143. No accommodations will be made without this documentation.

Student Handbook

You are responsible for all policies stated in the Student Handbook.

See: http://commons.raritanval.edu/studenterv/conduct/pages/Policies_and_Documents.aspx

Withdrawal Procedure

See school's webpage for Fall 2018 Withdrawal and Refund Schedule and Refund Info

Note: 11/9 last day to withdraw

(see:

https://commons.raritanval.edu/admin/finance/Documents/Fall2018%20Refund_Withdrawal%201805%20POSTER.pdf)

(see: http://commons.raritanval.edu/admin/finance/Pages/refund_info.aspx)

Class Schedule

Please see the Class Schedule and/or the Syllabus tab in Canvas for the listing of lecture topics and timing of homework / labs / research projects / exams

:)
