

CSIT 105 –Lab 1 – Supplement
Using NetBeans as an Integrated Development Environment (IDE) with Java

To create a new Java Project in NetBeans, select **File** then **New Project...**

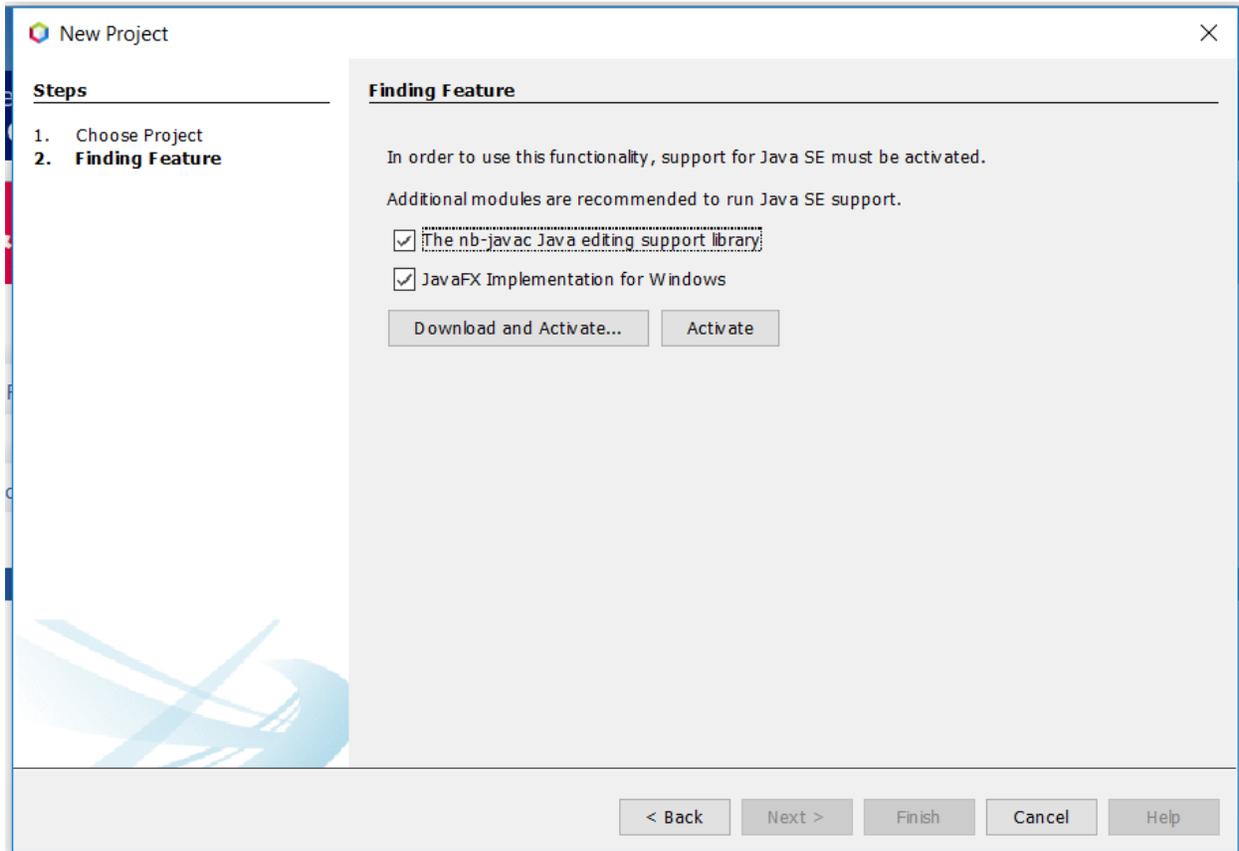

Make sure “Java with Ant” and “Java Application” are selected and click **Next**

CSIT 105 –Lab 1 – Supplement
Using NetBeans as an Integrated Development Environment (IDE) with Java

The first time, you may need to Activate Java SE

CSIT 105 –Lab 1 – Supplement

Using NetBeans as an Integrated Development Environment (IDE) with Java

Enter the project name in the **Project Name** field then click **Finish**

New Java Application

Steps

1. Choose Project
2. **Name and Location**

Name and Location

Project Name:

Project Location: Browse...

Project Folder:

Use Dedicated Folder for Storing Libraries

Libraries Folder: Browse...

Different users and projects can share the same compilation libraries (see Help for details).

Create Main Class

< Back Next > **Finish** Cancel Help

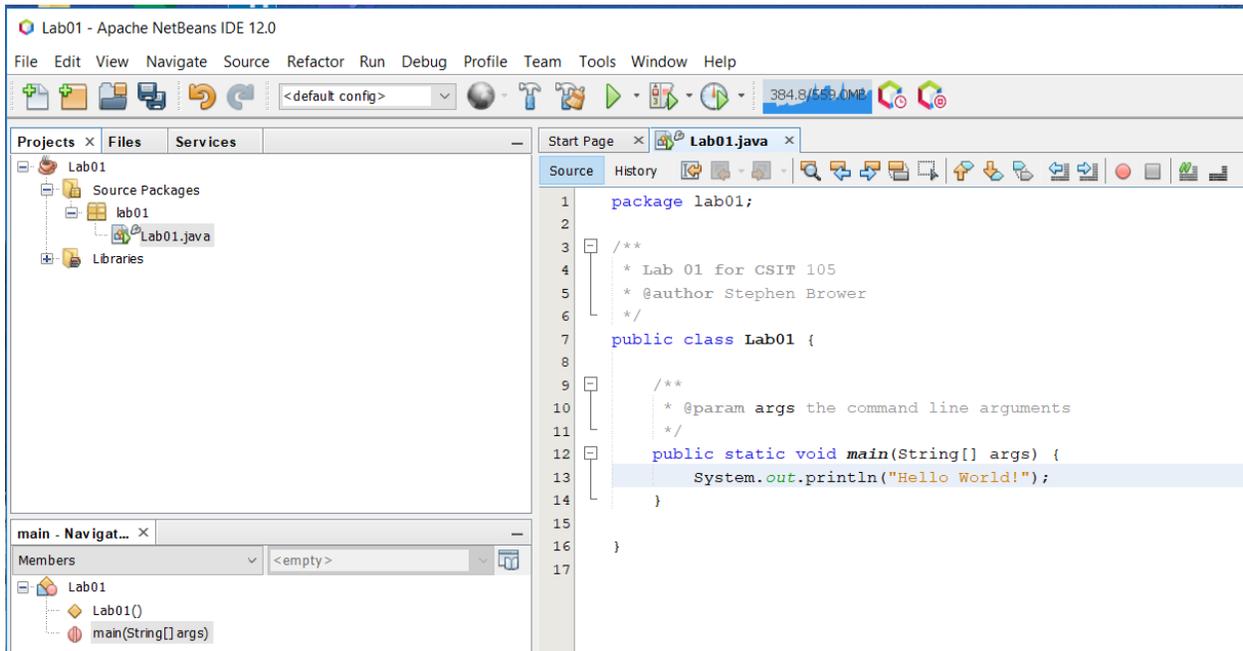

A template for the class for the project is created:

```
1  /*
2  * To change this license header, choose License Headers in Project Properties.
3  * To change this template file, choose Tools | Templates
4  * and open the template in the editor.
5  */
6  package lab01;
7
8  /**
9   *
10  * @author G00116196
11  */
12  public class Lab01 {
13
14      /**
15       * @param args the command line arguments
16       */
17      public static void main(String[] args) {
18          // TODO code application logic here
19      }
20
21  }
22
```

CSIT 105 –Lab 1 – Supplement

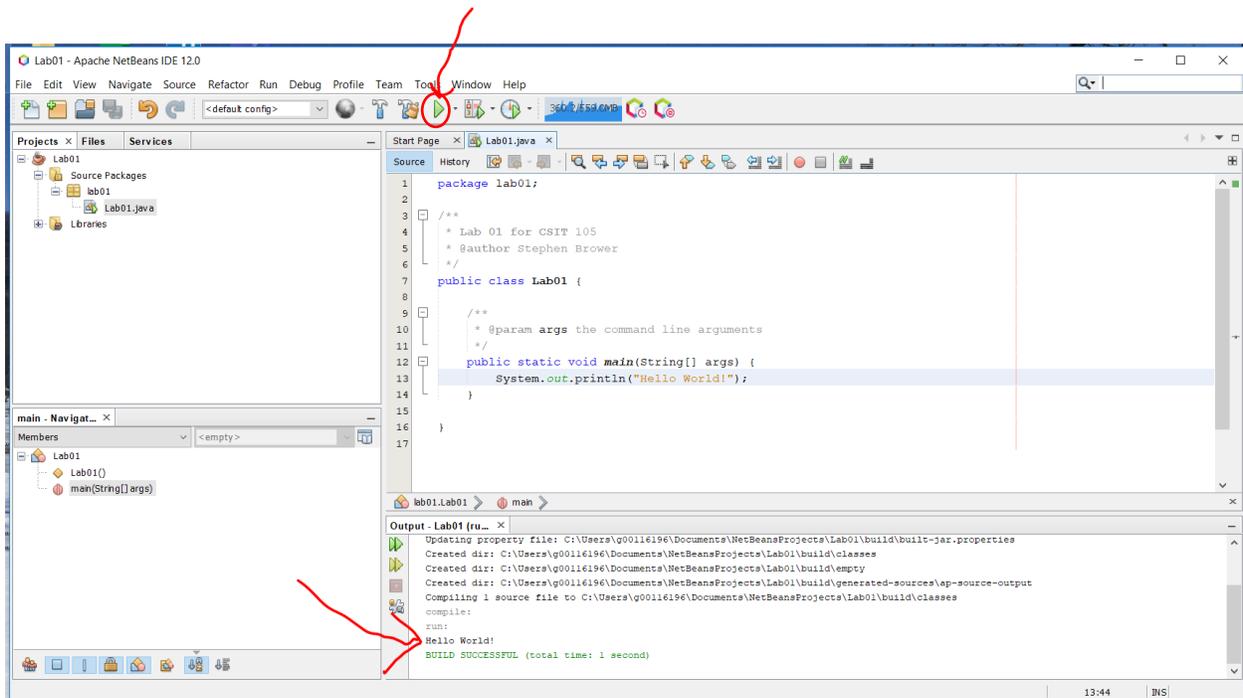

Using NetBeans as an Integrated Development Environment (IDE) with Java

Lab 1

If no error messages exist in the line numbers column, then you can Run the program.

To run, click on the Run Project button (looks like a Play button) – results at the bottom of the screen

CSIT 105 –Lab 1 – Supplement
Using NetBeans as an Integrated Development Environment (IDE) with Java

Source Code Location for **Lab01** is in file **Lab01.java** in folder
“...\Documents\NetBeansProjects\Lab01\src\lab01”
