

CSIT 254-51X Data Structures CRN 17206
Syllabus v0.1

Section Info:

Section 51x - CRN 17206

Tuesday 5:30 pm - 10:15 pm West Building W309

Versions

- Version 0.1 - 9/3/2019 - first release
- Version 0.0 - 8/12/2019 - Draft

Book Information

Data Structures & Other Objects Using Java, Michael Main, 4th Edition

Picture of book:

Instructor

Name: Stephen T. Brower

Office: West Building W324

Work # (908) 526-1200 x8259

preferred email: stephen.brower@raritanval.edu

Note:

For those that had a class with Brower before the Fall 2019 semester take note: there is a VERY different Late/Life Happens policy than in the past

Instructor Website

Website has information on any changes to office hours (example: no office hours on Thanksgiving)

Website has a link to the class page for this course where you can get the Syllabus and Class Schedule. Website does not require you to logon

See: <http://rvccmccs01.raritanval.edu/~sbrower/>

CSIT 254-51X Data Structures CRN 17206
Syllabus v0.1

Fall 2019 Office Hours (8/28 - 12/9)

- Monday 3:00 - 4:00
- Tuesday 5:00 - 5:00
- Thursday 3:00 - 5:00
- AND by appointment

Course Overview

Prerequisite: CSIT(CISY) 105 Foundations of Computer Science or GDEV(CISY) 242 Object Oriented Programming:

This course introduces students to the fundamental data structures used in Computer Science. The data structures covered include linked lists, doubly linked lists, stacks, queues, trees, and graphs. Algorithms that manipulate these data structures are discussed and used in laboratory work. Students are introduced to the run-time analysis of algorithms and basic algorithms for searching and sorting.

General Education Goals:

After completion of this course, students will be able to:

1. design and develop data structures that efficiently address program requirements (G.E. 1)
2. analyze the data structures used in computer applications and the issues surrounding their implementation (G.E. 2, 4)
3. apply quantitative reasoning to analyze the performance of data structure algorithms in order to efficiently solve problems (G.E. 7)

Course learning outcomes:

At the conclusion of the course, students will be able to:

1. compare and contrast the basic data structures used in Computer Science: lists, stacks, queues, trees and graphs
2. identify and implement the basic operations for manipulating each type of data structure
3. create data structures using Java
4. analyze the run-time analysis of algorithms and express them using $O ()$ notation
5. apply recursion to data structure operations
6. identify the appropriate data structure for a given problem
7. analyze algorithms to search or sort the data in various data structures (arrays, queues, stacks, etc.) and interpret their run-time performance
8. create and execute test plans which include the testing of boundary conditions

CSIT 254-51X Data Structures CRN 17206
Syllabus v0.1

Honors Option

An Honors Option is available for this course. A general requirement for Honors courses and Honors Option courses is a minimum grade point average of 3.5

"Definition: Students pursuing the Honors Option will be required to demonstrate a higher level of knowledge and skill in each of their course programming projects. They will be required to take the concepts introduced and generalize them for broader application. Students will also do independent work researching application programming interfaces." (Master Course Outline)

For this Honors Option, the demonstration of a higher level of knowledge and skill will be through enhanced Labs and Projects. The independent work for research will be through additional research components for Homework

The expectation is that all of the 'honors option' exercises be completed. However, since the 10th day is the last day to switch to the honors option section, then the expectation is that 90% of the 'honors option' exercises be completed. If more than 10% of the 'honors option' exercises are not completed then for the assignments completed without the honors option beyond 10% of the assignments a penalty will be assessed

For some of the assignments, there are extra credit options for the students in the 'regular section' that are mandatory for the students in the 'honors section' and the grade is based on the proportion of the total points. For example: suppose there is 15 points extra credit on an assignment, for the students in the 'honors section' their grade is based on the total points / 115. If a student switches from the 'honors section' back to the 'regular section', the grade will be recalculated.

Enrolling in the Honors Option Section: By the "10th Day of the semester" (aim for 9/5) fill out an Add/Drop form that drops Section 51X and adds Section 51H and get the instructor's signature (by 9/5) and the department chair's signature. After the form is filled out and signed then take it to the registrar.

Exiting the Honors Option Section: If you wish to switch back to the regular section, by the withdrawal date (11/8), fill out an Add/Drop form that drops Section 51H and adds Section 51X and get the instructor's signature and the department chair. After the form is filled out and signed then take it to the registrar.

CSIT 254-51X Data Structures CRN 17206
Syllabus v0.1

Which Email to use and Email Response Time

If you have a question or you need an assignment “returned to you” in Canvas, the preferred (fastest) way to contact the instructor is via his preferred email: stephen.brower@raritanval.edu

Over the last several semesters, I found the email system embedded in Canvas frustrating. So please email me at: stephen.brower@raritanval.edu

The goal is to respond in less than 24 hours.

Occasionally there are known exceptions such as around Thanksgiving where a response may take a little longer. If the instructor knows ahead of time there will be a period of unavailability longer than 24 hours, that will be communicated to the class.

Software / Computer Requirements

The computer labs have the software needed to complete the in-class labs.

If you own a computer you can download the Java JDK and NetBeans which will replicate the setup that we have on campus. There are links from the instructor's Course Web Page with some information.

For access to Java outside of class time, if you do not own a computer, you can use the Open Lab on the second floor of the West Building which is open 6 days a week. See the hours posted outside the Open Lab

Canvas, will be used for distribution of files and notes.

Course Routine

Classes will usually consist of 3 possible segments: Lecture, Lab Lecture, and Lab Time

Lecture

A majority of the lectures will be on topics within Data Structures. Some of the lecture will be the theoretical nature of Data Structures, which will include a number of crudely drawn pictures, a discussion of algorithms that act on Data Structures, and in some cases Pseudocode.

Lab Lecture

the Lab Lecture will be an introduction to the week's lab which could be a review of the topic(s) introduced in the Lecture or simply "here".

CSIT 254-51X Data Structures CRN 17206
Syllabus v0.1

Lab

There are two kinds of labs: *Data Structure Labs* and *Programming Labs*. *Data Structure Labs* will be paper-based group exercises related to the Data Structure topics from the lectures. *Programming Lab* will be for individual work using the computer to implement Data Structures in Java to solve problems. During Lab time, take as many breaks as needed.

If you finish the lab early, you should look ahead on the Class Schedule to work on the next programming project (if posted) or do the next homework that is due

Grade Determinants:

Item	Percent
Homework	10%
Data Structure Labs	10%
Programming Labs	20%
Programming Projects	20%
Mid-Term Exam	15%
Final Exam	25%

Grade % Range

A	89.5-100.0+
B+	86.5-89.4
B	79.5-86.4
C+	76.5-79.4
C	69.5 - 76.4
D	59.5 - 69.4
F	0 - 59.4

Homework

The Homework will be posted in Canvas. Homework must be submitted electronically via Canvas as a document saved as a **.docx** or **.rtf** file.:

See below for the Late Policy and the Cheating Policy (don't cheat)

CSIT 254-51X Data Structures CRN 17206
Syllabus v0.1

Data Structure Labs

For classes that introduce new Data Structures, the Data Structure Lab on a topic may be a drawing showing a series of operations on a Data Structure.

The instructor will review the Data Structure Lab before the beginning of lab time.

Most Data Structure Labs will be paper based, can be done in small groups, and are due at the end of the class in which they are distributed

See below for the Late Policy. Since the Data Structure Labs are group-based, the Cheating Policy as stated below isn't applicable.

Programming Labs

Programming Labs will be programs written independently in Java to implement a Data Structure to solve some problems.

All of the Programming Labs have some assumptions for clean input so that the focus can be on the writing and use of the data structure. For example assuming a number entered is a number.

Some Programming Labs have been abbreviated to be done in the class-time allotted and those abbreviated labs are due at the end of the class by 10:15 pm and ones submitted after 10:15 pm will receive a Late Penalty because extra time was taken.

Some Programming Labs have not been abbreviated and there is some wiggle-room on the submission. Wiggle-room will be indicated on the lab assignment.

The instructor will review the Programming Lab before the beginning of lab time.

The .java* files are to be submitted as attachments to the assignment in Canvas - *alternatively, a .zip file of the folder that contains the .java files or a .zip of the NetBeans project.

See below for the Late Policy and the Cheating Policy (don't cheat)

Programming Lab Compiling Policy

As a second course using Java, the expectation is that your Java code will compile. For all of the Programming Labs from Programming Lab 4 and beyond, if the code submitted does not compile, or if the instructor's tester used to test the classes submitted does not compile, the assignment is a 0.

CSIT 254-51X Data Structures CRN 17206
Syllabus v0.1

The only edits that will be made to get the program to compile is to remove the `-#` that Canvas adds to the file name when there are additional submissions and the package statement

Programming Projects

The idea behind Programming Projects is that they are more complex than labs and are used to demonstrate mastery of Data Structures. A number of them also do not have the assumptions for clean input that the Programming Labs have.

A reminder that Java is in the open Lab in the West Building which is open 6 days a week. Java is also available for download from the Oracle WebSite. See the instructor's website for more information.

The `.java*` files are to be submitted as attachments to the assignment in Canvas. alternatively, a `.zip` file of the folder that contains the `.java` files or a `.zip` of the NetBeans project.

See below for the Late Policy and the Cheating Policy (don't cheat)

Project Compiling Policy

As a second course using Java, the expectation is that your Java code will compile. For all of the Projects, if the code submitted does not compile, or if the instructor's tester used to test the classes submitted does not compile, the assignment is a 0.

The only edits that will be made to get the program to compile is to remove the `-#` that Canvas adds to the file name when there are additional submissions and the package statement

Exams

Note the Class Schedule for the dates of the exams. If you are late for the exam, you will only have the time until the scheduled end of the exam.

Exams must be taken on days assigned. If you know ahead of time that you cannot make an exam, ask the instructor to arrange for the exam to be left in the testing center or to arrange another time.

About a week before each exam, a 'information' sheet on the exam will be distributed. That information sheet will cover the format and content of the exam.

Failure to notify the instructor that the Midterm exam will be missed will result in a makeup that *might* be harder, *not by design, but by consequence of being different*. Missing the Final Exam will result in a 0 on the Final Exam so that grades can be submitted on time before fleeing the state.

CSIT 254-51X Data Structures CRN 17206
Syllabus v0.1

The Midterm Exam will be one hour long; the Final Exam will be two hours long. Both exams will be closed note /closed book / closed computer, and cumulative up to that point.

Cheating Policy - *Don't cheat!*

Cheating is not allowed on Homework, Programming Labs, Programming Projects, and Exams. All parties involved in cheating will receive a 0 and will be reported to the dean. Excessive cheating within the class can result in an F for the course. Excessive cheating at RVCC can result in expulsion. Consult your student manual.

NOTE: you have permission to use the instructor's demo .java files, in whole or in part, for your programming labs and programming projects (just cite that in a comment in the code) and you have permission to use the code the instructor writes on the whiteboard (just cite that in a comment in the code) and you have permission to use the code in the book, in whole or in part (just cite that in a comment in the code).

NOTE: if you are getting a compilation error, turning to your neighbor and asking them what the error means is ok. As for the neighbor giving an answer to a compilation error question, these are examples of ok answers: 'you misspelled the variable name' or 'you're missing a ;' or 'you shouldn't have a ;' or 'you're missing (a) curly brace(s)...no the curlier curly brace' or 'you know the code is on the slides' or 'you know the code is in the book' or my favorite answer: 'the instructor wrote the code on the board, didn't you write it down?'

Late Policy

Don't submit work late!

Programming Labs: It would be unfair to grade a Programming Lab submitted 24 hours late the same as a Programming Lab submitted on time, when the lab was designed to be written in the 2 hour lab window. That is why a late penalty is applied to late Programming Labs; because they have an unfair advantage. Regardless of when the instructor grades the Programming Lab, the date/time will be noted.

Some Programming Labs are handed out 2 days before they are due and there is more wiggle-room on those.

Homework: Since the time frame for homework is a bit longer, the instructor's approach is a little different. When sitting down to grade a homework assignment, whatever is in Canvas is on time

CSIT 254-51X Data Structures CRN 17206
Syllabus v0.1

(regardless what Canvas says). If the instructor has to go back and grade a homework assignment after the batch for the class was graded, then that homework is late

Projects: Since the time frame for Projects is a bit longer, the instructor's approach is a little different. When sitting down to grade a Project for the class, whatever is in Canvas is on time (regardless what Canvas says). Projects can not be submitted late so missing projects at the time when Projects are graded are 0.

Only 2 items per category (Homework, Programming Lab, Data Structure Lab) can be submitted late. One of the 2 items for a category can use "Life Happens" and for the other a "Late Penalty" is applied.

"Life Happens"

For Homework, Data Structure Labs, and Programming Labs you are allowed 1 "Life Happens" for each category. A Life Happens allows an assignment to be submitted one week late and be considered on time. Life Happens cannot be used more than 1 week after an assignment is due. Note: you have to actually submit an assignment to be graded for the Life Happens. You cannot just say "life happens" and expect to see 100 on the grade book.

"Late Penalty"

For Homework, Data Structure Labs, and Programming Labs you are allowed 1 "Late Penalty" for each category. The "Late Penalty" is -10 points per calendar day with a maximum of 7 days.

"Life Happens" or "Late Penalty" cannot be used after 12/3. That means no "Life Happens" or "Late Penalty" can be used for the last Homework.

Compiling Policy

As a second course using Java, the expectation is that your Java code will compile. For all of the Projects and for all of the Programming Labs *starting with* Programming Lab 4, if the code submitted does not compile, or if the instructor's tester used to test the classes submitted does not compile, the assignment is a 0.

The only edits that will be made to get the program to compile is to remove the -# that Canvas adds to the file name when there are additional submissions and the package statement.

Extra Credit

Some exams/homework/labs/projects contain extra credit questions/opportunities. Other than that, no extra credit opportunities will be provided.

CSIT 254-51X Data Structures CRN 17206
Syllabus v0.1

For example, if you choose not to submit ANY homework and then in December you ask for "Extra Credit" to make up for the missed homework, the answer is NO.

Classroom Behavior

Cell Phones:

For the "lectures" please silence cell phones. It is understood that there may be times when emergency calls occur or the "pick me up at the airport" call needs to happen. For those calls please step into the hallway to take the call. During lab time, you can turn the sounds back on the cell phones.

Talking:

For the "lectures" please don't talk. It is understood that you may need to turn to a neighbor for the occasional question like "what slide is he on?" or "which file is that?" or "what page # did he say?" and that's fine. It is the full conversations that are distracting not only to me but to the class as a whole. For the Lab Time you can talk all you want, but "indoor voices" please.

Language:

The instructor will try his darn-doodliest to not swear during class time but an occasional expletive may slip out. Please try your darn-doodliest not to swear but don't fear reprisals if an occasional expletive slips out.

Proper Use of Computers:

During Lecture:

the instructor is easily distracted by typing and would prefer that computers are not used during the lecture. **Printing during lecture is extremely distracting and very upsetting** Pointing and laughing at the monitors is very distracting. If class members repeatedly distract the instructor, then all computers and laptops must be closed down.

During Lab:

During lab time everyone should be working on the labs/projects/homework. None of the labs/projects/homework require social media sites.

Class Attendance

Students are expected to attend all classes for every course in which they are enrolled. To accommodate students' reasonable, personal situations that might prevent them from attending classes, each student is entitled to excused absences amounting to the equivalent of one week's class time in a semester. Absences in excess of this standard are handled individually by each faculty member. A student with absences amounting to one-fifth or more of the term's

CSIT 254-51X Data Structures CRN 17206
Syllabus v0.1

lecture or laboratory classes is subject to administrative withdrawal by the Dean of Instruction upon the recommendation of the faculty member.

Note:

sometimes attendance is taken based on what graded items were not returned. If you come in late and see that graded items were returned, please wait for a break or Lab Time to get your graded items

Delayed Opening

If the College announces a delayed opening at any location due to inclement weather or other emergency situation, all offices will be closed and all College classes and/or other activities will be suspended at that location until the delayed opening time. Classes scheduled to begin before the delayed opening time that have 60 minutes or more of instruction time remaining at the delayed opening time will begin at the delayed opening time and conclude at the regularly scheduled ending time. Classes scheduled to begin before the delayed opening time that have fewer than 60 minutes of instruction time remaining at the delayed opening time will be canceled. Classes scheduled to begin at or after the delayed opening time will meet as scheduled.

Translation/Adjustment for this class:

Based on past history, I never saw a delayed opening past 5:30

Campus Resource Center & Food Pantry

Any student who has difficulty accessing sufficient food to eat, stable housing, or meeting other basic needs, and believes this may affect performance in this course, is urged to contact campus Resource Center for support. The Resource Center and Food Pantry is located behind the Student Lounge/Game Room on the second floor of College Center, across from the cafeteria. For more information contact the Resource Center at resourcecenter@raritanval.edu the Food Pantry at food.pantry@raritanval.edu (see <https://commons.raritanval.edu/academics/dept/hs/pantry/Pages/Services.aspx>) or Advising and Counseling Services at acs@raritanval.edu

Reasonable Accommodation

Students with disabilities who require accommodations (academic adjustments and/or auxiliary aids or services) for this course MUST provide documentation of accommodations from the RVCC office of Disability Services, C143. No accommodations will be made without this documentation.

CSIT 254-51X Data Structures CRN 17206
Syllabus v0.1

Support Services

“As a student you may experience a range of issues that can cause barriers to learning. We care about your overall well-being and RVCC Counseling Services is here to help with any issues you may experience”.

If you are experiencing suicidal thoughts, personal distress, and/or addictions:

Counselors are available during business hours in the Advising and Counseling Services (ACS) suite, 1st Floor, College Center. Personal crises are a priority in ACS and all services are free and confidential.

For appointments, call (908)526-1200 X8336 or email counselors at personalcounseling@raritanval.edu. Emails will not be checked outside of the hours of operation. After hours, or during college breaks or closures contact: **Psychiatric Emergency Screening Services (PESS) at 908-526-4100 (24/7) or dial 911 and go to your nearest emergency room.**

On and Off Campus Resources:

<https://commons.raritanval.edu/studenterv/conduct/Pages/Emergency-Contacts.aspx>

N.J. HOPE LINE at 855-654-6735 for peer support and suicide prevention hotline;

REACH NJ at 844-732-2465 for help navigating/accessing treatment for addiction

Student Handbook

You are responsible for all policies stated in the Student Handbook.

See: https://commons.raritanval.edu/studenterv/conduct/pages/Policies_and_Documents.aspx

Withdrawal Procedure

See school's webpage for Fall 2019 Withdrawal and Refund Schedule and Refund Info (see: https://commons.raritanval.edu/admin/finance/Documents/Fall%202019%20WithdrawalRefund%20Schedule%20and%20Enrollment_Payment%20Calendar.pdf)

(see: https://commons.raritanval.edu/admin/finance/Pages/refund_info.aspx)
