

# Moon mission Museum Kiosk

## Medium

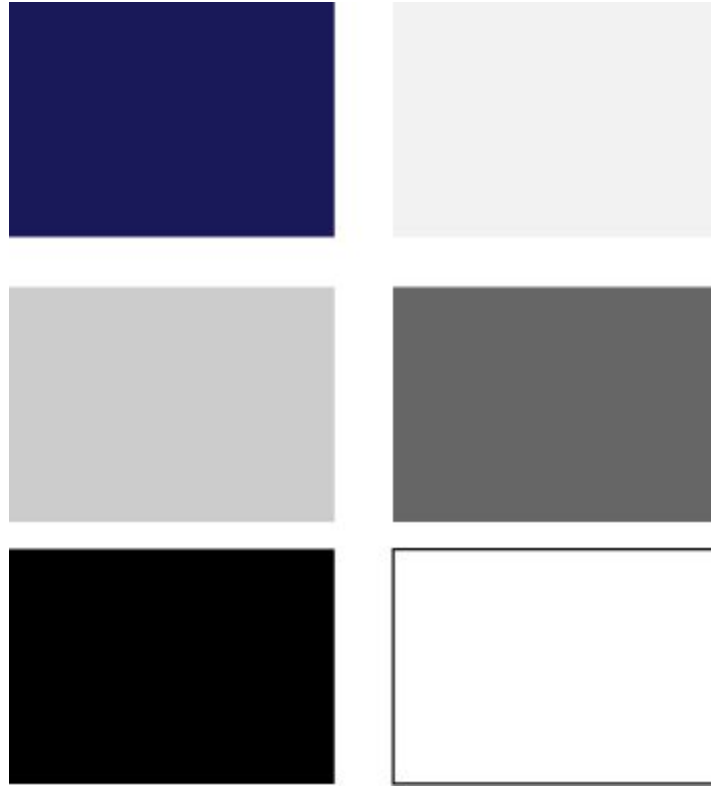

The medium for this will be a kiosk for a museum with a moon exhibit

## The Typeface

Typeface will be using the font "Space mono", the size of the fonts will vary due to the amount of space provided. I will use this font because it has a font similar to ones used in early sci-fi movies.

## Colors

Colors for buttons will consist of grey (#666666), dark grey (#4D4D4D) light grey (#CCCCCC), white (#FFFFFF) and black (#000000)  
Background is a Dark BLue(#191959).

## Screen Layouts

None of the buttons or main inputs should be close to the %2 of the screen besides the next and previous buttons

## Buttons size and navigation example

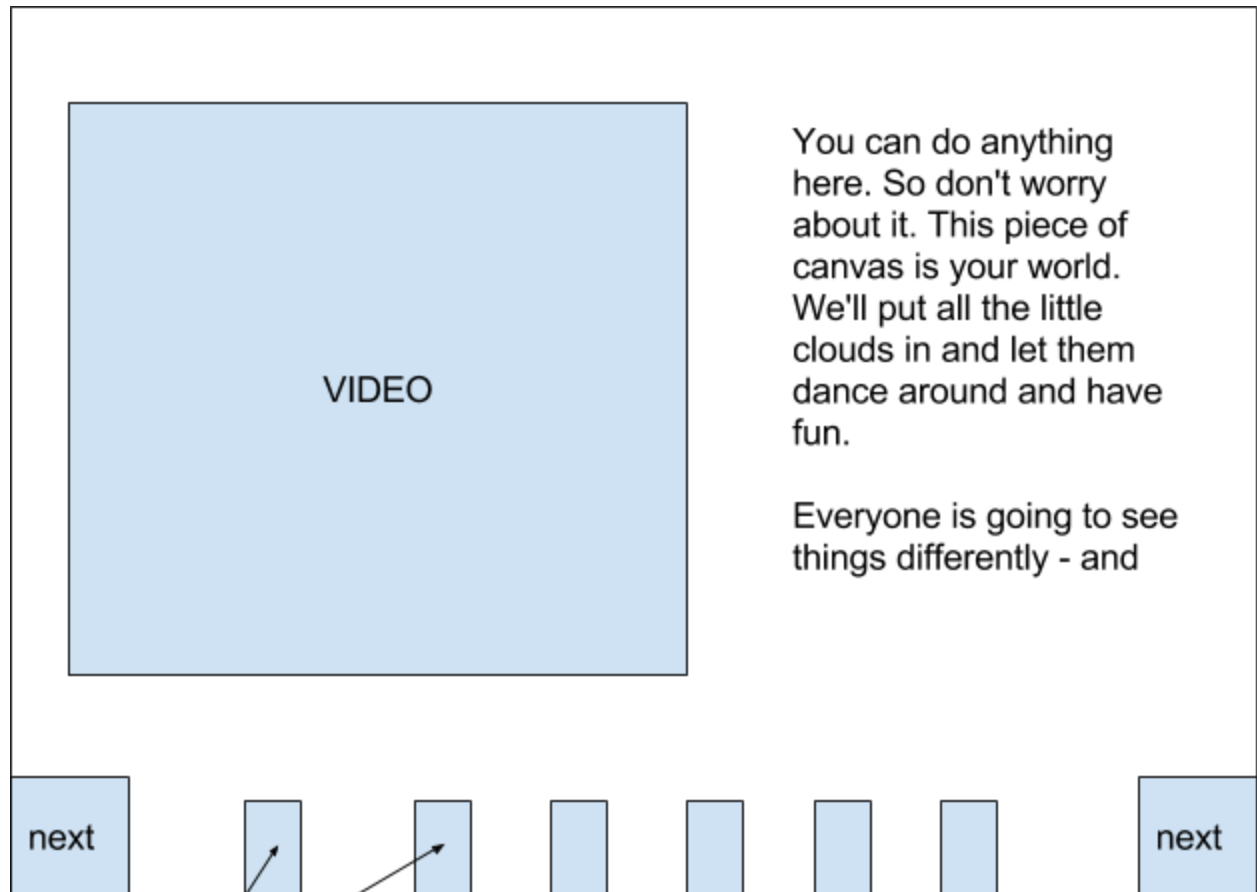

Should be this size and has text directing to the correct slide

## Placement of elements

Buttons for navigation in corners. Tabs should be at the bottom. Text should be centered to the right. Media should be centered to the left.

**These come together to  
form pages similar to  
this**

Navigation tabs
