LAB #1 3font styles

- **JURIIJ** This font is a san-serif font with overdone ascenders and descenders with an outline. Aesthetically, this font
- **RAITHAITUS BAK** This font is somewhat of a san-serif font that has more of an imaginative feel. Aesthetically, this font is artsy and original to say the least but still appealing in its own right. This font would be good for children books, especially because of its artsy and comical feel but still legible.
- **CAROLINGIA** This font is an exaggerated calligraphy serif style font. Aesthetically, this font flows fluently and is a beautiful form of a script style font. This font would be good for restaurant logos because it is elegant, science fiction novel covers and movie titles because of its ancient feel.
