

Giddyup Std

Giddyup font is a decorative font. It is distinctive in its style with letters' tails and ears.

I chose this font, first of all, it is different from the font I chose for the first. I wanted to choose something different from other two fonts I chose. It may be hard to read, but it is fun. It is also decorative, but not too crazy decorative to my eyes.

I would use this font for kid's birthday party card, riddles, or game narrative font. (i.e. Maplestory – Ellinia)
