

# Elephant

**Elephant font is an ultra-bold serif typeface. It is a slab class font.**

**It feels aesthetically appealing to me, because the font seems very speaking in bold and strong manner. Also I would like to use it for titles to give accent. Nevertheless, the font does not seem to yell at the readers, rather seems to be stay classy and elegant while giving strong impression.**

**I would use it for a blog title, formal event cards (i.e. wedding cards), or a title of article.**

**Elephant font**

**Elephant font bolded – it looks better without bold in my opinion, because the font looks pretty bold by itself.**
